

Ideaconsult

[Ideaconsult Ltd](#) is a SME providing consultancy, technical services and software development in the areas of chemoinformatics, QSAR and data mining since 2004.

[Ideaconsult](#) currently leads the framework implementation WP of the **OpenTox FP7 project**.

It develops and maintains several well-known and widely used open source software products relevant to this project, in particular **Toxtree** (used, for example, in the application of the threshold of toxicological concern), **Toxmatch** (for encoding and applying chemical similarity indices) and **AMBIT**, a **QSAR** decision support system, including generic database management, structure conversions and searching, as well as applicability domain assessment.

These tools have been carefully designed and developed in close co-operation both with academia, regulatory bodies and industry. Some of the code base could be effectively re-used, adapted and further enhanced to meet the objectives of the project.
